Full-stack engineer with 4+ years of experience building scalable, user-focused web applications using React, Node.js, and modern backend technologies. Proven track record leading feature development and resolving production issues in high-impact enterprise and SaaS environments. Adept at designing intuitive UIs and optimizing system performance across the stack. Currently driving product innovation as an SDE III at Walmart.

WORK EXPERIENCES

Software Development Engineer - 3
Walmart | 2024 Feb - Present

React.js | Node.js | MongoDB | Microsoft Azure | AI Dashboard

❯ Took ownership of key features within the **FeedbackAlly** team, proactively driving stability improvements that resulted in 99.9% uptime and a 30% reduction in bug resolution time.

❯ Engineered an **auto-save feature** for the FeedbackAlly survey platform, increasing form submission rates by 22% and improving reliability for end users.

❯ Enhanced survey engagement by integrating **media upload** functionality, allowing users to provide richer feedback and improving response quality.

❯ Developed intuitive visualizations and filter options in the **AICatalog dashboard**, enabling better monitoring of AI model performance and faster insights for internal teams.

Software Development Engineer
Klenty | 2022 Sep - 2023 Dec

TypeScript | React.js | Node.js | Unit Testing | CRM Integration

❯ Engineered robust **email deliverability features** in the Customer Management Platform using React (TypeScript), Node.js, and Express, enhancing user communication workflows.

❯ Optimized backend performance and data integrity under high concurrency by effectively designing and querying with MongoDB.

❯ Increased codebase reliability by rigorously expanding **unit test coverage**, reducing critical bugs and improving deployment confidence.

❯ Led cross-functional development efforts, driving seamless integration of new features while enforcing clean architecture and **agile best practices**.

Product Developer
Survey sparrow | 2021 Mar - 2022 Aug

React.js | JavaScript | Node.js | PostgreSQL | Sequelize.js

❯ Resolved complex customer issues with speed and accuracy as a key member of the **Customer Active Response Team**, directly contributing to improved user satisfaction and retention.

❯ Developed and maintained scalable product features using **React**, **Node.js**, and Hapi, with **PostgreSQL** managed via **Sequelize** ORM for efficient relational data handling.

❯ Drove agile execution by actively participating in sprint planning, retrospectives, and cross-functional collaboration to ensure timely and high-quality releases.

❯ Championed **clean**, **modular code** architecture, aligning with industry best practices to improve maintainability and support long-term scalability.

SKILLS

Technical

JavaScript | Typescript

HTML | CSS | Bootstrap

Node.js | React.js

Express | Hapi

PostgreSQL | MySQL

Practices

Unit Testing

Test Driven Development

Agile lifecycle

Clean Code

EDUCATION

**B.Tech
Information Technology**

Government College of Technology
2017 - 2021

PROJECTS

2048 - Javascript Game

Built and deployed a responsive web version of the **classic 2048 game** using HTML, CSS, and JavaScript, focusing on smooth gameplay and a clean UI.

AWARDS

Firefighter Recognition

Awarded the "**Firefighter**" badge for outstanding ownership and rapid resolution of critical issues in the FeedbackAlly platform, ensuring high system reliability and minimal user disruption.
