SUMMARY

Senior Software Engineer who turns architecture into signed deals — authored the proposal that won **Viome**'s Japan market-entry partnership with **Glico**, then built and shipped that backend solo. 5+ years engineering enterprise-grade full-stack products in React.js, Next.js and Node.js, with 99.9% uptime and 30% faster bug resolution at Walmart Global Tech.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), SQL
Frameworks	React.js, Next.js, Node.js, Express, Hapi.js, REST APIs, Strapi CMS
Data & Cloud	PostgreSQL, MongoDB, MySQL, Sequelize, Microsoft Azure, Git, CI/CD
Analytics	Google Analytics, Fullstory, Statsig (A/B testing), Jest, TDD
Practices	Agile/Scrum, Code Review, Clean Architecture, Mentoring

PROFESSIONAL EXPERIENCE

Senior Software Engineer — **Invictus** (client: **Viome**) Oct 2025 – Present

Next.js · Node.js · PostgreSQL · Strapi · Statsig · Fullstory

- Pitched and authored the backend architecture that won **Glico** as Viome's Japan market-entry partner — the technical proposal that closed the deal within 6 weeks.
- Shipped the entire Node.js/PostgreSQL backend solo: registration APIs and dynamic question-answer APIs powering personalized health questionnaires per user.
- Partnered directly with Glico's Japan team to ship the integration, then generalized the architecture into a multi-partner portal — letting Viome onboard future partners with zero rework.
- Own Viome's Next.js marketing site end-to-end, driving a 5% lift in sales through performance and conversion gains. Introduced Fullstory and Statsig experimentation into the stack, and mentored an intern to independent delivery.

Software Engineer III (SDE III) — **Walmart Global Tech** Feb 2024 – Sep 2025

React.js · Node.js · MongoDB · Microsoft Azure

- Owned core features of the FeedbackAlly survey platform — stability work that sustained 99.9% uptime and reduced bug-resolution time 30%.
- Engineered an auto-save capability that increased form submission rates by 22% and eliminated partial-response data loss.
- Shipped survey media upload (+15% detailed qualitative feedback) and built AI Data Catalog visualizations that shaved performance-monitoring time 50% for data science teams.

Software Development Engineer — **Klenty** Sep 2022 – Dec 2023

TypeScript · React.js · Node.js · MongoDB · Jest

- Built a high-throughput email deliverability module handling 1M+ daily transactions at a 99.8% success rate across CRM-integrated campaigns.
- Cut average API response time 35% under high concurrency by restructuring MongoDB queries and adding strategic indexes.
- Raised Jest coverage on critical services from 30% to 85%+, slashing production bugs 40%; mentored two junior engineers through three feature launches.

Product Developer — **SurveySparrow** Mar 2021 – Aug 2022

JavaScript · React.js · Node.js · PostgreSQL · Sequelize.js

- Resolved complex full-stack production issues on the Customer Active Response Team at a 95% satisfaction rating, lifting user retention 15% over two quarters.
- Refactored the core application into modular, reusable components and services, reducing new feature development time by 20% and lifting team velocity 10%.

EDUCATION

B.Tech, Information Technology

Government College of Technology, Coimbatore · 2017 – 2021

AWARDS

Firefighter Recognition — Walmart Global Tech

For ownership and rapid resolution of critical production issues on FeedbackAlly
