SUMMARY

Senior Software Engineer with 5+ years delivering enterprise-grade full-stack products in React.js, Next.js, and Node.js. Architected the backend behind **Viome**'s Japan market-entry partnership with **Glico**. Previously owned core features and platform reliability for FeedbackAlly, **Walmart Global Tech**'s internal survey platform used by data science teams.

PROFESSIONAL EXPERIENCE

Senior Software Engineer — **Invictus** (client: **Viome**) Oct 2025 – Present

- Authored the backend architecture and technical proposal that secured **Glico** as Viome's partner for Japan market entry, with the agreement finalized within six weeks.
- Designed and built the foundational Node.js/PostgreSQL backend, including registration APIs and dynamic question-answer APIs that generate personalized health questionnaires for each user; led the engineering team as the project scaled while remaining hands-on in development.
- Collaborated with Glico's Japan team throughout integration, then generalized the architecture into a multi-partner portal, creating a reusable foundation for Viome to onboard additional partners going forward.
- Maintain end-to-end ownership of Viome's Next.js marketing site, running Statsig A/B experiments that validated conversion improvements prior to rollout. Established Fullstory session analytics within the stack and mentored an intern to independent delivery.

Software Engineer III (SDE III) — **Walmart Global Tech** Feb 2024 – Sep 2025

- Owned core features of the FeedbackAlly survey platform — stability work that sustained 99.9% uptime and reduced bug-resolution time 30%.
- Engineered an auto-save capability that increased form submission rates by 22% and eliminated partial-response data loss.
- Shipped survey media upload (+15% detailed qualitative feedback) and built AI Data Catalog visualizations that shaved performance-monitoring time 50% for data science teams.

Software Development Engineer — **Klenty** Sep 2022 – Dec 2023

- Built a high-throughput email deliverability module handling 1M+ daily transactions at a 99.8% success rate across CRM-integrated campaigns.
- Cut average API response time 35% under high concurrency by restructuring MongoDB queries and adding strategic indexes.
- Raised Jest coverage on critical services from 30% to 85%+, slashing production bugs 40%; mentored two junior engineers through three feature launches.

Product Developer — **SurveySparrow** Mar 2021 – Aug 2022

- Resolved complex full-stack production issues on the Customer Active Response Team at a 95% satisfaction rating, lifting user retention 15% over two quarters.
- Refactored the core application into modular, reusable components and services, reducing new feature development time by 20% and lifting team velocity 10%.

TECHNICAL SKILLS

Languages & Core	TypeScript, JavaScript (ES6+), Python, SQL, Node.js, Express
Frontend	React.js, Next.js, Shopify (headless, checkout extensions), Strapi CMS
Data & Infrastructure	PostgreSQL, MongoDB (NoSQL), MySQL, Redis, Kafka, Kubernetes, Microsoft Azure, Docker, Git, CI/CD
Architecture & Practices	Microservices, query optimization, Clean Architecture, Agile/Scrum, Code Review, Mentoring, Jest, TDD, Statsig (A/B testing), Fullstory, Google Analytics
Also worked with	Angular, C#

EDUCATION

B.Tech, Information Technology
Government College of Technology, Coimbatore · 2017 – 2021

AWARDS

Firefighter Recognition — **Walmart Global Tech**
For ownership and rapid resolution of critical production issues on FeedbackAlly
